

MapInfo ProViewer v9.0 Download

****NOTE:** Users are advised to ensure that they comply with the license agreements of any datasets that they view using ProViewer. In some cases this may require the purchase of additional data licenses.

Download Requirements

- MapInfo Professional v9.0
- Windows Vista
- Windows 2000 with Service Pack 4
- Windows XP Professional with Service Pack 2
- Windows XP Home with Service Pack 2

Download

Product Component	Files
MapInfo ProViewer v9.0	Proviewer90.exe (67 MB)
Documentation	User guide Help system

Download Instructions

1. Create a temporary directory on your hard drive such as C:\ProViewer
2. Download the self extracting archive (ProViewer90.exe) and place the file in the temporary directory created in Step 1.
3. To expand the archive that you downloaded in step 2, in your Windows Explorer double click on the self extracting exe file. During this process, the zip program will prompt you where to unzip the data, please choose the temporary directory that you created in Step 1. After you run the self extracting archive you will have files in your temporary directory along with a setup program.
4. Once all the files you downloaded in Step 2 have been decompressed (in Step 3), there will be a SETUP.EXE in your temporary directory. Running this program will start the install wizard that will lead you through the rest of the installation process.
5. ProViewer v9.0 is now installed on your system.
